Introduction

1. In response to the note of the Secretary-General of UNCTAD dated 23 November 1973 requesting preference-giving countries to provide information on the operation of their respective schemes of generalized preferences, the Hungarian Government provided information for total imports and individual products under its scheme. This information is summarized below, and the data on Hungarian imports from beneficiaries presented in tables 1 and 2 of the annex.

Hungarian imports from beneficiaries in 1983

2. Table 1 shows, for all and individual groups of beneficiaries (Part A) as well as for each beneficiary (Part B), total, MFN dutiable, and covered/ preferential imports of products falling within CCCN chapters 1-24, 25-99 and 1-99. The data on imports from the least developed countries is given in part C of the table.

3. Hungary registered imports from 52 beneficiaries, of which only one did not supply goods covered by the scheme. Hungarian dutiable imports from beneficiaries amounting to $719.1 million were virtually all covered by the scheme ($708 million) and received preferential treatment. Consequently, the utilization rate was 98.5 per cent.

4. Nine major beneficiary suppliers (MS) accounted for 81 per cent of dutiable and covered/preferential imports ($580.7 million and $572.4 million, respectively). Ranked by order of importance of their imports receiving GSP treatment, these major suppliers were: Brazil, India, Chile, Iraq, Malaysia, Egypt, Islamic Republic of Iran, Mexico and Pakistan.

5. As can be seen in part C of table 1, Hungary recorded imports from eight least developed countries (LDCs) valued at $21 million, all of which received preferential treatment. Three LDCs (Bangladesh, Botswana and Sudan) together accounted for 94 per cent of these imports.

Major products and their principal suppliers

6. As shown in table 2 of the annex, preferential imports of these products amounted to $552.7 million or 78.1 per cent of total preferential imports from all beneficiaries. More than half ($322 million or 58.2 per cent) consisted of industrial products, and the remaining proportion ($230.8 million or 41.8 per cent) of agricultural products. Principal suppliers, some of which were also the major exporters, accounted for 94.4 per cent of these imports.

7. The most important agricultural products were: oil cake and other residues (CCCN: 23.04 - $128 million); unroasted coffee (CCCN: 09.01 - $38 million); and cocoa beans (CCCN: 18.01 - $31 million). The most important items among industrial products were: petroleum oils, etc. (CCCN: 27.10 - $181.8 million); cotton yarn (CCCN: 55.05 - $25.7 million); ginned cotton (CCCN: 55.04 - $25 million); natural rubber (CCCN: 40.1 - $17.5 million); natural calcium (CCCN: 25.10 - $10.8 million; calf leather (CCCN: 41.01 - $8.5 million); and mineral or chemical fertilizers, phosphatic (CCCN: 31.04 - $7.1 million).

Statistical Annex

The designations employed and the presentation of material in this document do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country, territory, city or area, or of its authorities, or concerning the delimitation of its frontiers or boundaries. The terminology used is in general that of the responding Government.

GE.90-51575/2036B

INTRODUCTION

1. In response to the note of the Secretary-General of UNCTAD dated 23 November 1973 requesting preference-giving countries to provide information on the operation of their respective schemes of generalized preferences, the Government of Norway has provided information on various categories of imports of products covered by its scheme for the period from 1983 to 1985. A summary of the information on Norwegian imports from beneficiaries is given in table 1 of the statistical annex, showing, for all and individual groups of beneficiaries (Part A) as well as for each individual beneficiary (Part B), total, MFN dutiable, covered and preferential imports of products falling within the relevant CCCN chapters.

NORWEGIAN IMPORTS FROM BENEFICIARIES IN 1983, 1984 AND 1985

2. Norway registered imports from more than 100 countries and territories recognized as beneficiaries of its scheme. However, only a small number of these beneficiaries (38 in 1983 and 48 in both 1984 and 1985) availed themselves of the benefits of preferences under the Norwegian scheme. Norwegian imports from beneficiaries in 1985 amounted to $1,274.5 million, of which $417.5 million, abouth 33 per cent, were MFN dutiable. Nearly 58 per cent ($241.5 million) of these dutiable imports were covered by the scheme. However, less than half ($104.7 million or 43.4 per cent) actually received preferential treatment. Likewise, imports which were granted GSP treatment in 1983 accounted for 48.5 per cent ($63.5 million) of those covered by the scheme ($131 million).

3. As in the past, the rate of utilization of the scheme in respect of all products has remained relatively low, providing no indication of a trend towards fuller utilization of the scheme by preference-receiving countries. It rose from 48.5 per cent in 1983 to 51.3 per cent in 1984 and fell sharply thereafter to stand at 43.4 per cent in 1985. Moreover, while the coverage ratio (share of covered imports in dutiable imports) in respect of agricultural products remained relatively higher than that in respect of industrial products, the rate of utilization (share of preferential imports in covered imports) for the latter products was, on the average, three-and-half times higher than that for the former.

4. Nine major beneficiary suppliers (MS) in 1983 and another 11 in both 1984 and 1985 accounted, respectively, for 78.1 per cent, 81.6 per cent and 85.1 per cent of preferential imports from all beneficiaries. In descending order of preferential imports for these years, these major beneficiary suppliers were in:

1883: Republic of Korea, China, Yugoslavia, Singapore, Hong Kong, Brazil, Malaysia, Israel, and Morocco.

1984: Republic of Korea, China, Yugoslavia, Hong Kong, Singapore, Israel, India, Brazil, Malaysia, Turkey and Morocco.

1985: Repubic of Korea, China, Yugoslavia, Singapore, Israel, Hong Kong, India, Brazil, Malaysia, Argentina and Morocco.

IMPORTS FROM LEAST DEVELOPED COUNTRIES (LDCs)

5. While all dutiable imports of Norway from LDCs consisted of products covered by the scheme, the rate of utilization of the scheme in respect of these products has not varied substantially from year to year, except in 1985 when it increased by 11.1 per cent, rising from 33.3 per cent in 1984 to 44.4 per cent in 1985, mostly because of the sharp increase in preferential imports from Botswana and Nepal.
